

# Precision protective packaging. Designed, manufactured and delivered in as little as three days. Not weeks.

We specialize in custom reusable and one-off protective solutions for shipping high-value, fragile and sensitive equipment. When others lack the capabilities or say it simply can't be done in time, we deliver.

Our team of packaging experts engineer for durability — using precisely chosen substrates

fabricated to exacting tolerances. Your cargo will safely endure even the toughest trans-shipment and arrive without damage.

And we'll take your project from design and prototype to finished precision packaging that's in your warehouse ready to use in as little as three days. We guarantee it.

✓ Precision-engineered packaging

✓ Short production lead times

✓ <0.001% in-transit damage probability

## Superior packaging design

Experienced design team backed by the latest CAD software and the latest CMC equipment and tooling for precision fit manufacturing done fast

## Complete end-to-end solutions

Extensive material inventory and just-in-time lean manufacturing processes to allow packaging supply in days, not weeks

## Rapid responsive turnaround

Empowered, customer-centric team backed by world class engineering team for fast answers and results

## Specialists in Custom Packaging

- In-built toolless fastening systems for fast, easy load and unload
- Extensive materials inventory and just-in-time delivery management
- Two facilities with 90,000+ sq ft manufacturing and warehousing space
- Design for manufacture approach QMS/BMS—ISO9001 Certified
