

# All your custom packaging under one roof for faster turnaround times, simplified coordination, & a frictionless vendor experience

We solve real (and costly) protective packaging problems for expensive and fragile industrial equipment that others cannot—or will not. And we deliver packaging projects in a matter of days when it takes others weeks.

We can do this as we are a complete, full-service custom-packaging inhouse manufacturer (not a distributor or consultant).

We carry a large raw materials inventory in our twin modern, high-capacity production plants with state-of-the-art capabilities. Plus, we back it with a talented design team and empowered customer service team for immediate action and rapid solution development.

✓ Shortest Leadtimes in the Industry

✓ Fast Turnaround

✓ Accurate Fulfilment

## How we deliver a frictionless vendor experience

### Complete end-to-end solutions

We offer a total customer packaging solution from concept and prototyping to manufacturing and delivery of custom packaging to your warehouse. No middlemen, no outsourcing, and no excuses as the buck stops with us.

### Empowered team backed by management

Our flat integrated management structure means fast, accurate decisions authorized at the line level. We're big enough to solve any packaging problem, yet small enough to care about you, our customers.

### The 'no asshole' rule

We are approachable people with a culture of integrity. From the plant floor to the boardroom, we have an unrelenting commitment to do the right thing by our customers and deliver a frictionless vendor experience.

## No outsourcing. All in-sourced.

We've insourced key manufacturing for faster lead time and so we control it!
