

Your protection is our mission

CMMC Level 2 security for sensitive CUI data

Larson Packaging Company is moving quickly toward full CMMC Level 2 Compliance by Q2 2026. This achievement will place us among the few industrial packagers at this security standard, ensuring full compliance and reliable protection for your Controlled Unclassified Information (CUI). This reduces risk and demonstrates our commitment to security in your supply chain.

Bullet proof your packaging supply chain

Our robust NIST SP 800-171 standards significantly lower the chance of CUI leaks stemming from your packaging supplier.

Work with a partner that checks every box

When you partner with us, you are proving to DOD and other government departments that your packaging project is backed by verified, high-level security.

Close the gaps in your supply chain

Our Level 2 compliance ensures your supply chain is a hard target against cyber threats posed by sub-tier suppliers with poor cyber security and vulnerabilities.

Be audit-ready, every day

We utilize third-party assessments rather than just self-reporting, ensuring actual compliance and accountability needed to satisfy government auditors.

Protect your reputation

A security breach can destroy a decade of trust in seconds. Our CMMC Level 2 standard helps protect your reputation.

ISO 9001:2015 Certification

This shows that our systems, processes, people, and records are professionally managed and continually improving.

ITAR Registered

ITAR registered companies must register and keep their registration current with the Department of State's Directorate of Defense Trade Controls (DDTC), which oversees the US Munitions List (USML).

(NIST) Special Publication 800-171

We meet all DFARS requirements and follow NIST SP 800-171 guidelines to ensure top-level cybersecurity as a contractor in the Defense Industrial Base.

Commitment beyond CMMC

Our commitment to providing the highest levels of quality and service doesn't stop at CMMC Compliance as demonstrated by these certifications.
